

Solid Silicate Tile

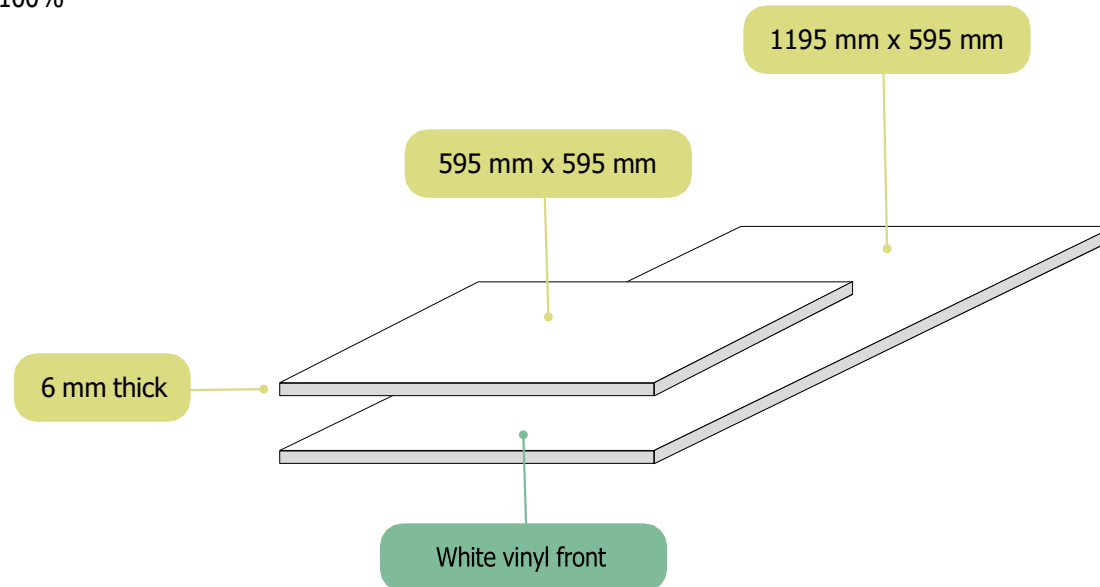

Product information

Produced from calcium silicate, these tiles are strong, durable and moisture-resistant without degradation. Best suited for ceilings in areas exposed to high humidity as well as hygiene-sensitive areas.

Physical data & specifications

- **Packed:** 10 tiles per box
- **Humidity resistance:** 100%
- **Weight:** 12.5kg /m²

Features

- Non-combustible
- Best suited for hospitals and schools
- Enhances air-conditioning efficiency, helping reduce long-term operating costs
- Provides added strength, minimizing the risk of breakage, even in harsh conditions

Fire resistance:

Non Combustibility: Class A/A1/1

BOQ Text

6mm x 1195 x 595 SOLID Calcium Silicate ceiling tiles suspended on SOLID ceiling 24mm wide 0.4mm thick exposed tee suspension system comprising main tees at 1200mm centers with cross tees between each tile including hold-down clips, etc., all suspended with a galvanized hangers at 1200mm centers.
